

Nathan M

Custom website builder, frontend learner and practical tech support helper

Contact

Location: Swansea, Wales

Age: 25

Email: hello@nathm.net

Website: nathm.net

Core skills

- Custom HTML5, CSS and JavaScript websites
- Responsive layouts for mobile, tablet and desktop
- SEO basics and clean site structure
- Contact forms and email-draft enquiry flows
- Cloudflare, DNS, SSL and launch checks
- General tech support and troubleshooting

Technical tools

HTML5, CSS3, JavaScript, responsive design, static websites, forms, SEO basics, accessibility basics, Cloudflare, DNS, VPS launch support and tech support.

Education

GCSE ICT: Grade C

GCSE English: Grade D

Additional learning has been mainly practical and self-directed through building websites, testing tools, solving setup issues and improving real projects.

Personal profile

I am a practical, self-taught web and tech person based in Swansea. I build clean, custom websites with HTML5, CSS and JavaScript, plus simple tools, SEO basics, Cloudflare setup and everyday tech support. I enjoy making websites that are clear, usable and built around the business rather than forced into a generic template.

Website and project experience

Built the nathm.net portfolio as a custom static website with service pages, demo business websites, app demos, downloadable PDFs, privacy information, launch notes, responsive layouts and basic SEO structure. The project shows custom site building without relying on WordPress, website builders or generic templates.

App and tool examples

Created working HTML5 and JavaScript demos including a calculator, quote estimator, invoice maker, booking planner, task board, SEO checker, launch checklist, content planner and brand palette generator.

Tech support skills

Can help with practical tech issues such as Cloudflare setup, DNS records, SSL checks, redirects, hosting guidance, email setup basics, phone issue triage, suspicious pop-up cleanup guidance, backups, safer settings and general troubleshooting.

Working style

I like making things clear and useful. I can take rough notes, organise page structure, improve wording, build a first version, test it across screen sizes and make sensible changes before launch. I am honest about what I know and quick to research what I do not know.

Availability

Open to small website projects, junior web or IT support opportunities, local tech help in Swansea and remote support where suitable.
